The Spark Gap

January 1992

Novice Class: The club will be sponsoring a Novice class starting on Monday February 3rd at 7 PM. The classes will be in the meeting room of the Civil Defense. Present plans call for an 8 to 10 week course. The class last year seemed to produce more prospective no-code techs than code-novices. If this happens again it will probably be our last effort to have a Novice class. If you know of any prospects for the class please pass the word along.

Reminder: Club dues are now due. You can mail your dues or pay them at the January 18th meeting. The address for mailing is:

Mid-State Amateur Radio Club
P. O. Box 836
Franklin, In. 46131

Reminder: If you pay your ARRL dues through the club we can keep two dollars of your fee for our club!

NEW TECH

Recently we featured an article about "Intelligent Shopping Carts" and now we have reports of "Intelligent" vending machines! The Tokyo Coca Cola company is now using microprocessors, wireless

telecommunications, and network technology to tie its vending machines into its on-line system for tracking sales and inventory. The machines will be fitted with radio transceivers so they can exchange data with a central computer.

The radio transmissions are handled through a service that provides dedicated radio bands for high-speed data transmission. The radio signals go to and from a central terminal which is connected to the host computer at the head office via normal telephone lines. If trials are successful, the company will extend the service to most of their machines. Question: If the U. S. copies this, will it present yet another challenger for a piece of the Amateur Radio allocated spectrum?

Quote from 100 years ago: We know little as yet about the mighty agency of electricity. Some tell us it is a ~~kind of~~ matter. Others view it not as mat as a form of energy. Still others: both these views. One professor c it a mode of manifestation of Higher authorities cannot even y whether we have one electricity opposite electricities! Therefore to persevere in experimen observation. Even if we never le... electricity is, we shall assuredly discover more about its attributes and its functions. We have progressed!

Franklin High School Holds Amateur Radio Class

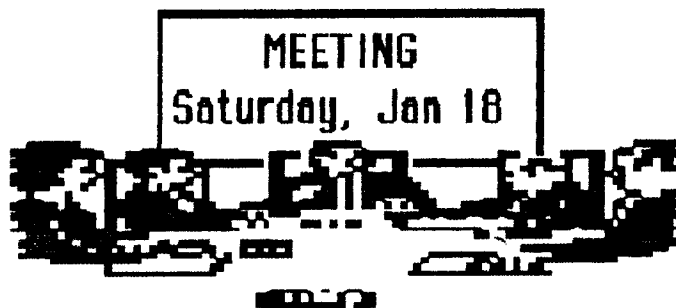

Seventeen students at Franklin Community High School have been learning about amateur radio in a nine day intensive class. The students spend the entire day with teacher Barb Coboon (KB9GWF). They have each built a morse code trainer and are learning to send and receive the code. They are also trying to learn the theory necessary to pass the novice exam which will be offered to them on Friday, January 17, by Mac McCarty (NV9K) and Keith Coboon (K9PDI).

It hasn't been all work though. Bob Doles (WB9AYB) spoke to the students and answered many questions. He also demonstrated the equipment in his van. Mary Alice Comstock (WB9SPX) also spoke to the students. Mary Alice is the school librarian and already known to the students.

The students also took field trips to tour the WTHR TV and WZPL radio stations. Thanks to Erio Sluder (KB9BGS) they were able to tour GTE Telecomm. They also spent some time at Keith Coboon's "ham shack".

Students enrolled in the class are: Tim Arnold, Ethan Ferry, Nathan Goode, Mike Haggard, Jason Hargis, Kristin Harmon, Jason Hilton, Paul Howard, Chris Lepper, Tracy Long, Jim Moore, Brad Odom, Kent Petro, Keith Ping, Tim Smock, Andreas Sohnlein, and Chad Wiedenbaupt. Andreas is an exchange student from Switzerland. When he returns home and passes his test he'll be able to keep in touch with his friends from Franklin.

FROM THE PRESIDENT: I hope everyone had a nice holiday season and are ready for another year. I would like to see a big turnout for the club meeting this saturday. We are hoping to have a talk on broadcasting by Larry KB9FVJ of channel 40 TV. Also Jack, NT9J, has some video tapes to show. See you there!

NEW YEAR'S RESOLUTION:
To try to attend all the club
meetings!

HAPPY NEW YEAR
